

# Sustainable Finance Disclosure Regulation (SFDR)

Become SFDR Compliant with High Quality ESG Regulatory Data

Effective SFDR compliance relies on accurate ESG information from investee companies and manufacturers of financial products. With SIX, you can access high quality SFDR-related ESG data, enabling you to fulfil your disclosure obligations easily and transparently.

## The Data Challenge

The EU Sustainable Finance Disclosure Regulation (SFDR) requires asset managers, insurers, banks, and other financial market participants to disclose how they integrate sustainability risk and principle adverse impacts (PAIs) in their investment process - at both entity and product level.

Yet sourcing accurate, granular data across investee companies and product manufacturers is challenging. Data fragmentation, varying methodologies and limited disclosures increase operational burden and hinder timely, accurate reporting.

## The SIX Solution

SIX supports clients in their compliance efforts with a data and content that addresses these SFDR requirements and challenges. SIX SFDR offerings helps clients meet these regulatory requirements by providing structured, high-quality data on PAI indicators, product classifications (Articles 6, 8, and 9) and relevant pre-contractual and periodic disclosure documents. Built to align with EU regulation, our solution supports clear, consistent, and scalable compliance across large product universe.

SIX sources the required data accordingly and maps it to the respective companies as well as to the underlying ISINs (if appropriate), while also leveraging already existing regulatory offerings and our well known high

quality reference data. With our data service for SFDR-related data, manufacturers of financial products and investment firms can rely on complete, clean, enriched, high quality data to disclose more easily and accurately.

#### **Key Benefits**

Our SFDR data:

- Is based on SIX's proven regulatory data competence and leverages our renowned reference data, so you can easily stay compliant with complete, clean, enriched, high quality data.
- Reduces the complexity of disclosure with one reliable data source to cover your SFDR data needs.
- Seamlessly integrates with other SIX regulatory datasets to provide a holistic view of ESG regulatory data requirements – supporting reporting across multiple frameworks e.g. EU Taxonomy, MiFID II, and IDD.

#### **Why You Can Rely on Us and This Service**

SIX has long-lasting expertise and an excellent reputation in implementing regulatory data within given timeframes, e.g. MiFID II and PRIIP.

You can receive this data through the same delivery channels as our reference, corporate actions, regulatory and tax data and much more.
