

Build the Company Brain – Unlocking Knowledge

START HACK ZURICH – SIX Challenge

Katharina Voegtle & Jacob Gertel

May 29, 2026

Four Areas of Activity One Company

Exchanges

Second-largest stock exchange group in Europe by market share

- › **European exchange innovator:**
One plug, three trading venues
- › **Second largest IPO** with SMG
- › Pioneering **capital markets** innovation (e.g., dark pool)
- › One of the most **successful SME listing** segments in the EU

Securities Services

Unbeatable post-trade services from A to Z and more

- › **Leading global CSD** for private banks and wealth management
- › One of the largest **European cash-equity CCPs**
- › **Innovative** securities finance business
- › **The largest European trade repository** services

Banking Services

Smooth payment transactions

- › **Market leader** in transaction processing services in Switzerland
- › **High growth business** with card and billing services
- › Backbone for **Swiss open banking** ecosystem with bLink
- › **Innovation track record**, e.g., CH Secure Finance Network

Financial Information

Making a difference with data

- › **Innovative delivery services** via APIs and cloud
- › **Deep expertise** in corporate actions and reference data
- › Exposed to **high growth areas** like Indices and ETFs
- › Strong **client and revenue retention** track record

The Problem – Individual Knowledge That Cannot Scale

Critical knowledge is tied to individuals and gets lost when people move roles or leave

Information is fragmented (documents, emails, systems)

Context, reasoning, and decision history are not preserved.

New employees struggle to find relevant knowledge.

Knowledge exists, but it is not accessible, reusable, or scalable in a sustainable way

Your Challenge:

How can we tap into someone's brain and systems, and make knowledge accessible and reusable at scale?

Subject Matter Expert

- Capture expert knowledge in context
- Make it accessible and reusable to the organization
- Ensure governance, sustainable availability and data quality

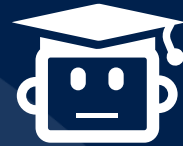

Users of solution
(SIX Financial Information employees)

The Use Case

**You will work with
a real SIX Subject
Matter Experts**

**These experts hold
critical, experience-
based knowledge**

**The goal is to ensure this
knowledge remains
available even after they
leave**

Your Solution Should...

**Capture and
structure tacit and
explicit knowledge**

**Enable easy
access and reuse
via AI**

**Ensure traceability
& trust (e.g. sources,
reasoning)**

**Respect
governance and
access control**

What You Get...

- Real use case and SME context
- Sample data and documents
- Freedom in technology choices

The collage includes a screenshot of the Official Journal of the European Union, Regulation (EU) No 600/2014 of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments and amending Regulation (EU) No 648/2012. It also features the SIX logo, a 'CONFIDENTIAL' stamp, and a screenshot of a data management system interface titled 'Master Data - Opening & Mutations'.

To Sweeten The Case Even Further...

Our SIX Offering:

- Management Pitch
- Pitch Training by the SIX Innovation Hub
- Tickets for the Swiss Finance Museum in Zurich
- SIX Goodie Bag

***If we solve this problem,
we unlock one of the
most valuable asset of
any organization:
its knowledge.***

Cosmina

Compliance Officer as User of SIX Data

How can we make sure we maintain Jacobs' knowledge so other teams can answer Cosminas questions when Jacob retires?

Background

Cosmina is an experienced banking professional with a strong foundation in financial regulations and law. She has at least a master's degree in law. Early in her career, she started in an entry-level compliance as a compliance analyst, where she gained practical knowledge of banking laws and internal controls. She holds a Certified Regulatory Compliance Manager (CRCM) certification from the American Bankers Association, demonstrating advanced knowledge in banking regulations and compliance risk management. Cosima is detail-oriented, ethical, and proactive. She possess strong analytical skills to assess complex regulations and large data sets, as well as excellent communication skills to educate colleagues and report to executives.

Use Cases

- Monitor banking operations to indicate anti money lading and fraud
- Risk assessment and mitigation through maintaining internal compliance policies aligned with current laws
- Advise on new initiatives on how compliance applies to various client use cases
- Investigations and issue resolution

Pain-Points

- Constantly changing regulations
- **Volume of Work and Data**
- Cultural resistance
- High Stakes & Pressure

Goals

- Keep the organisations 100% compliant with all relevant laws and regulations
- Protect Customer and Bank
- Efficient Compliance Operations & Program
- Staying ahead of regulatory changes

Behaviors and Traits

- Ensures decisions are justified through documented, audit-ready rationale
- Applies rigorous regulatory analysis and risk-based assessment
- Focuses on translating regulations into clear, enforceable guidance
- Adapts oversight approach based on regulatory context and risk exposure

Attitude: "To align the proposed compliance measures and the organizations business objectives requires close collaboration with different stakeholders and their buy-in into the rules and practices."

Compliance Officer Journey & Activities

	DISCOVER	INVESTIGATE	PREPARE	IMPLEMENT	MONITOR
Action	Track new regulations & Alerts	Assess impact on business	Define compliance approach	Roll out controls & changes	Oversee adherence & controls
Goal	Identify relevant regulatory changes early	Understand risk & exposure	Ensure clear, prioritized action plan	Achieve compliant implementation	Ensure ongoing compliance & transparency
Tasks	– Monitor regulators & subscriptions – Filter relevant updates – Share key alerts internally	– Perform risk & gap analysis – Identify impacted processes – Advise management	– Define actions & controls – Prioritize by risk/urgency – Align Legal / IT / Ops – Define data/reporting needs	– Update policies & procedures – Implement controls (IT & process) – Train staff – Test & document	– Monitor control effectiveness – Review adherence & exceptions – Support complex cases – Report to management
Pain Points	– High volume of regulatory noise – Hard to identify relevance quickly	– Unclear impact across systems – Data gaps for risk assessment	– Conflicting priorities across teams – Dependency on external data / stakeholders	– Complex coordination (IT, Ops) – Low user adoption / understanding	– Detecting breaches early – Keeping up with continuous change

Walter

Research

"I enable my company to do business responsibly."

Walter
HEAD COMPLIANCE OFFICER

ABC Bank Global

I enable our company to do business responsibly

Goals

I try to find the most efficient means of being compliant without disrupting business.

I ensure our reputation is not risked while doing business and generating profit.

I also have to try to reduce the costs of compliance and come up with viable solutions.

Motivations

I really like it when we have a solution in place that covers the regulatory requirements and is accepted and agreed by the business department.

Role & responsibilities

For new/changing regulations I early analyse the impact they have on my organization and engage in discussion with the business and executives.

I report to management and the board with regards to operational risks and costs of compliance.

I am also in charge of leading my people and promoting compliance in the company.

Frustrations

Complexity of the regulations and the cost of implementing them.

A lot to read...

I have to carefully manage my teams and their level of frustration.

Walter
HEAD COMPLIANCE OFFICER

Activity

Discover
Via summits or through consultants and subscriptions I stay abreast about regulatory changes.

Research
Either I inform myself about a regulation or I mandate and external consultant to provide me with the insights.

Investigate
Together with the relevant business heads I assess the impact of the regulation on the business.

Inform
Together with my peers from the business departments we inform the board of directors and the CEO about measures to take.

Manage
I manage the work of my compliance officers and the team of compliance monitoring.

Report
I regularly report on overall compliance levels and use the numbers and ongoing activities.
